

## TECHNOTE

### Document Password Protection

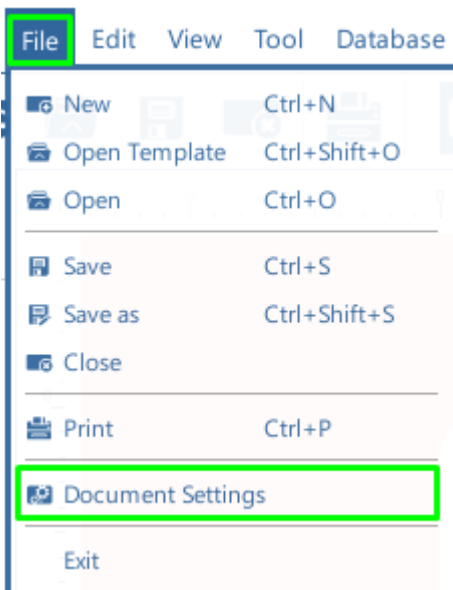

---

**DATE:** August, 2019  
**AUTHOR:** Bodno

---

In this technote, it will show how to enable the “Document Password Protection”.

First you need to open your design, then go to the top menu File >> Document Settings.

After that you just need to enable the check box for “Use Design Password Protection” and set your password.

Document Settings

**Document Information:**

**File Size:**

New

**Folder:**

New

**File Name:**

New

**Created:**

New

**Last Change:**

New

**Card Model:**

CR80

**Password Protection:**

Use Design Password Protection

Password

Password Confirmation

Use Production Mode Password Protection

Password

Password Confirmation

Close

Now every time the file is opened it will ask to that same password.
