How to capture webcam live, by changing source

---

**DATE: January, 2020**

**AUTHOR: Bodno**

---

To capture webcam live, by changing source, we will need to follow the next steps.

1 – Open Bodno software and click on the image acquisition button and past the image in your design view.

2 – After that, with the image selected, go to menu “**Source**” and chose “**From Camera or Scanner**”

The screenshot shows the 'Source' menu in the Bodno software. The menu is open, displaying several options. The 'From Camera or Scanner' option is highlighted in blue, and a mouse cursor is pointing at it. The other options in the menu are 'From Disk', 'From Camera or Scanner', 'From Signature Pad', 'From Biometrics Device', 'From Photo Editor', 'From Database', and 'Item Link'. The 'Source' tab is selected in the left sidebar, and the 'Open image editor' option is set to 'No'.

Item	From Camera or Scanner
Position	From Disk
Shape	From Camera or Scanner
Alignment	Updated
Rotation	When Item Double-Clicked
Outline	Save with document
Fill	Yes
Image	Format
Source	Image Free format
Script	Face Detection
	No
	Open image editor
	No

3 – Next go to the menu “**Source**” below and select your camera listed there.

Item	From Camera or Scanner
Position	Title Please select image
Shape	Source DEVICE: *NULL
Alignment	Updated When Item Double-Clicked
Rotation	Save with document Yes
Outline	Format Image Free format
Fill	Face Detection No
Image	Open image editor No
<b>Source</b>	
Script	

4 – Next double-click on the image and the video/image live acquisition should start being prompted.

If the device is not listed there, please make sure you have it correctly connected and detected on your computer, before launch the Bodno application
